Fatality Impact

all-in for a single fatality event and its litigation

Trained is not the same as cleared to work

The gap

A worker can be scheduled into hazardous work they are not currently qualified to perform.

The blind spot

Data is fragmented across HR, the scheduler, and the LMS, so no one can answer in time.

One governed control closes the gap

Predict lapses with time to act

Per worker, SHAP turns the score into a plain-language reason grounded in their own record.

And the nearest qualified
substitute to pursue.

The optimizer staffs a compliant crew from your workforce, and calls out risk

What-if: build tomorrow's compliant crew

The lapse-risk model scores every worker; a CP-SAT optimizer assigns the qualified pool to tomorrow's regulated seats, never breaking a compliance rule, preferring workers whose own certification is least likely to lapse. Seats it cannot compliantly staff are named, with the reason, so you act before the shift.

4

Seats compliantly staffed

2

Exposed seats now cleared

3

Cannot staff compliantly

Solve tomorrow's crew →

OPTIMAL - total assigned lapse risk 0.12. Hard compliance rules are constraints, never traded off.

PLASMA TABLE - Fall Protection + Hot Work / Welding
was Trent Boland — Not cleared

lapse risk 0.03

on schedule

Rafael Ibarra

INDIRECT - TOOLING - FIXTURING - Crane and Hoist Signalling + Lockout / Tagout

lapse risk 0.02

on schedule

Yvette Coleridge

STOCKROOM- SHIPPING- RECEIVING - Powered Industrial Truck

lapse risk 0.03

Still exposed — act before the shift

Not cleared

BAY OPERATIONS - MATERIALS

Powered Industrial Truck
Qualified capacity is fully committed to other regulated seats this shift.

First performance

BURN DEPT

Confined Space Entry + Hot Work / Welding + Lockout / Tagout + Respiratory Protection
First-time regulated work needs a qualified supervisor present; none available at Peoria IL - Plant 3081.

Not cleared

SPIN DEPT

Abrasive Blast and Coating + Respiratory Protection
No worker holds the full requirement (Abrasive Blast and Coating + Respiratory Protection) for SPIN DEPT at Peoria IL - Plant 3081.

Validated against a
15-question benchmark (87%
on the last run).

Safer floors, clean audits, leaner staffing.

The proof is in the demo.

Safer floors

Fewer unqualified-work exposures reaching the floor.

Clean audits

Readiness proven on demand, fewer citations and findings.

Leaner staffing

Compliant substitutes from your own workforce, faster time-to-staff.

The Architecture

One dataset flows through every layer · no silos

Unified Data Pipeline: **Ingest** → **Govern** → **Serve** → **Predict** → **Decide** → **Query**
